Lime-Loss in Tuberculosis

In the Journal of the American Medical Association (January 17, 1914) was the following: "Lime loss in tuberculosis is a well known fact. It has been many times stated that in tuberculosis or in the pre-tuberculous stage, the amount of calcium (lime) is lost, both in the urine and feces. In fact, a demineralization has been thought to be a forerunner of the development of tuberculosis."

"Forced feeding of tuberculosis patients and the enormous amount of eggs and milk once given such patients are not now considered advisable by a large number of physicians who are specializing in the treatment of pulmonary tuberculosis."

If tuberculosis is due to a loss of lime from the system, the success of Eckman's Alternative in the treatment of this disease may be due, in part, to the fact that it contains a lime salt so combined with other valuable ingredients as to be easily assimilated.

Always we have urged users of Eckman's Alternative to attend strictly to matters of food. In addition to rest and proper diet, some effective remedial agent seems to be needed, and in numerous cases of apparent recovery from tuberculosis and kindred throat and bronchial affections Eckman's Alternative has supplied this need.

It does not contain opiates, narcotics or habit-forming drugs, so it is safe to try. Your druggist has it or will order it, or you can get it from us direct.

lated to his birth and the marriage of his parents.

After an investigation of the circumstances surrounding Holt's death, William Hulse, warden of the Nassau county jail issued the following statement Wednesday:

"Holt met his death by plunging from the bars of his cell. He fell eighteen feet. His keeper, O'Ryan, was in charge of him and I always believed that O'Ryan was a trustworthy man. His orders from me were never to take his eyes off the prisoner. He was told if he wanted anything he should rap on the bars with a club and that his summons would be answered by another keeper. In running along the corridor to see what the disturbance was, O'Ryan disobeyed my positive orders. But I did not employ O'Ryan. He was employed by Sheriff Stephen P. Pettit."

NO ACCOMPLICE ARE KNOWN BY HOME FOLKS

(BY ASSOCIATED PRESS.) DALLAS, Tex., July 7.—Telegraphic correspondence with Washington authorities as to whether Frank Holt may have had accomplices in his dynamite exploits was made public today by Mrs. Holt's attorney. The attorney, J. E. Cockrell, yesterday telegraphed to Cone Johnson, of Tyler, Tex., solicitor for the state department at Washington, a copy of that portion of Holt's letter to his wife detailing the alleged placing of bombs aboard steamships. Superintendent of Police Pulliam, of Washington, then wired Cockrell.

"Honorable Cone Johnson transmits to this department your important telegram. Wish you would get in touch with Mrs. Holt and inquire if she knows of any possible persons who might have joined her husband in carrying out his plans about sinking steamer Philadelphia or Saxonia. Wire reply please."

Cockrell said he gave the following to Cone Johnson in the original telegraphic warning about the United States: "Mrs. Holt and Dr. Sensenbaur, her father, and I thought this should be put immediately before your department as a precaution although none of us believe he has any accomplice." Mr. Cockrell said he had wired Superintendent of Police Pulliam that the family here has no further information.

AN EXPERT BELIEVES ACCOMPLICES EXIST

(BY ASSOCIATED PRESS.) WASHINGTON, July 7.—Professor Charles Munroe, the expert in explosives of the bureau of mines who conducted the investigation here after Holt dynamited a room in the capital, declared today he was confident Holt had accomplices or at least some source of money for his operations. Prof. Munroe pointed out that Holt's pay was small but that his operations had been expensive. The kind of dynamite found in Holt's trail cost about \$6 a stick in the way Holt was buying it and his operations revealed travel which was far beyond his means.

sets of a state. The happiness and the general welfare of its citizens are the first obligation of a state. The generation growing up in West Virginia, its future men and women, will grow into the full stature of manhood and womanhood without knowing the open saloon, having healthy bodies, clear minds, and clean morals will be worth more to the state than all the material wealth. Compare, if you can make such comparison, the \$650,000 of annual revenue from liquor business with a generation of boys and girls, men and women, that know not the saloon."
